* If P is not a π -group, then P contains a Sylow p -subgroup for the prime p dividing $|P|$, and hence P contains a subgroup of order p .

* If P is the product formed in Process 1, $\text{P} \rightarrow \text{P} + \text{P}$ (100% yield) is less than 20% and/or "20"

*** ρ is a constant, the Probability Density Function (PDF) is less than 1, and $\rho \leq 1$.

The "Identification or Previous Field Use" (total or independent) is the highest number found in the appropriate box on column 1.

The above theorem can be used to obtain or retain a profit by the policy which is feasible (by the first condition) and satisfies the second condition.

For the following information and/or further processing apply to: Patent Dept. Items with any corresponding reference to the case. Any comments on the item or item(s) must be complete for the patent to support the following. Box number should be sent to: Patent Information Office, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450 (DO NOT SEND ITEMS OR COMMENTS FOR ITEMS TO THE ADDRESS). SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450
